Tankers – Chemicals – LPG/LNGs

Vessel	DWT	Built	Details	SS/DD	Price	Buyer
A huge transaction concerning VLCC tonnage has been reported involving c/o Frontline (as buyers) of 24 modern eco VLCC's from c/o Euronav (as sellers). The deal involves Korean built vessels ranging from 2015 and 2023.					USD 2.35 B	NORWEGIAN c/o Frontline

New Building

In tankers this week, Euronav declared an optional 319k dwt VLCC at Qingdao Beihai, with the vessel set to deliver in 3Q 2026 bringing their series to two at the yard.

In dry bulk, clients of Safe Bulkers announced ordering two methanol dual-fuel 81.2k dwt Kamsarmaxes at an unnamed Japanese shipyard, with the vessels expected to deliver in 4Q 2026 and 1Q 2027 respectively.

In the Gas Carrier market, Samsung announced an order for a 174k CBM LNG Carrier with an unnamed owner, reported to be MOL. The vessel is expected to deliver in September 2026.

Finally, in ferries, Fincantieri announced contracting a firm 1,000 passenger, 200 car Ferry for the Regional Government of Sicily. The vessel will be LNG dual fuel and is slated for delivery within 2026.

Recycling

Chicken and Egg!

Almost 280 attendees descended on Singapore this week for the annual Tradewinds Ship Recycling Conference resulting in some normal NGO spin but also positive expectations, particularly from Pakistan.

This was the first recycling conference since the Hong Kong Convention (HKC) was ratified and had a feel of some enthusiasm heading into the future. Almost all the yards in India, as has been well publicised, are fully compliant, there was confirmation from the Bangladeshi delegates that four of their yards are HKC approved by NK Class and showing good momentum in seeing other yards in Chattogram work towards HKC compliancy and, importantly, looking at acceptable avenues for the downstream waste management.

There was some positive news from Pakistan where a presentation provided evidence that they are attempting to upgrade their recycling yards to conform with the Hong Kong Convention requirements - whether they can do this by 2025 when the HKC comes into force remains to be seen. However, with no intertidal zone as such, the possibility is that the standard of yards, if improved correctly, will be on par with Turkey. This will be an interesting year and a half for the Pakistan recyclers and next year's conference (potentially moved back to Europe), may see this improved infrastructure in place at some of the yards.

What was evident throughout the discussions was the confusion being caused by too many regulations and the need for one global ship recycling permit, which all relevant bodies could adhere to, one which the European Union, environmental groups and flag states/regulatory bodies could all accept enabling a more sustainable and transparent recycling industry for ship owners, recyclers and everyone involved could work with. It did feel like a very productive conference again - however, the constant questions from the recyclers were "when will the ships start to arrive?" The market remains quiet and starved of tonnage, evident by the fact that there were few disturbances during the conference, no sound of ringing phones and participants up and down constantly leaving their seats to discuss business, this was left for the coffee breaks and post conference aperitives.

One other topic that attracted lengthy discussions, was concerning the 'shadow fleet'. With units/entities sanctioned, the real concern was where these units will end up when it is time for their inevitable recycling. The majority of the shipping community, including the recyclers themselves, would not be able to touch the vessels when the time comes which could cause a serious potential environmental disaster on the oceans.
