MARKET COMMENTARY

DCE iron ore futures tight by 0.69%. the main contract I2405 closed 879.5. Traders ship according to market conditions. Some steel mills tended to be wait-and-see, and purchased on demand. today's overall market transaction atmosphere in general. PBF at Shandong port dealt 890-900 yuan/mt; decreased 5-10 yuan/mt over yesterday. PBF at Tangshan port dealt 905-910 yuan/mt; decreased 5-10 yuan/mt over yesterday.

According to SMM statistics, this week (March 2nd to March 8th), the impact of blast furnace maintenance on molten iron was 1.6194 million tons, a decrease of 77100 tons compared to last week's maintenance. The impact of blast furnace maintenance next week (March 9th to March 15th) on molten iron is 1.6164 million tons, a decrease of 3000

Iron Ore Index Compilation Rationale and Data Exclusions

MMi iron ore indices are compiled from data provided by companies that are part of the iron ore supply chain and involved in spot market transactions. The indices are calculated using detailed transaction-level data submitted to MMi by these companies. This data is normalised to the appropriate specifications and screened to remove outliers before volume-weighted average prices are calculated from the remaining core set of data.

For more details on MMi's iron ore methodology please download the guide published on our website at: www.mmiprices.com

Data Exclusions*

	62%	58%	65%
Port Index	0	0	0
Seaborne index	0		0
Lump Index 62.5	0		

* Number of price submissions for iron ore indices that were excluded from index calculations today as they were anomalous and could not be verified

IRON ORE DOMESTIC CONCENTRATE INDEX CALCULATION METHODOLOGY

The compilation method for price index generally refers to the compilation method of CPI price index and other price indices, breakdown the price data and calculate the average value according to a certain method, taking the vertical axis as the regional composite index (average of different grade index) and the horizontal axis as the grade composite index (average of different regional index), a total composite index for domestic ore can be output ultimately. The process system is also adopted in the calculation i.e. each sub-index can be obtained as well.
