Recycling

Alang Horror Show!

The Indian recycling market has experienced a ghostly role this week as a continual daily fall in the domestic steel prices has filtered through to the recyclers, resulting in price indications from this destination reduce by some USD 20-30/ldt.

Local reports suggest that the weaker rates and uncertain domestic markets will continue to ensure the recyclers will remain low-spirited until after their forthcoming Diwali festivities (12th November), the only blessing is that the lack of tonnage should avoid any further dramatic reduction in price levels.

Elsewhere, the current ship recycling market in Bangladesh is struggling due to poor local demand. Weekly arrival reports at the Chattogram anchorage clearly show the decreasing number of vessels arriving for recycling. Two main pitfalls affecting this market are the lack of confidence in general business (upcoming national election) and the ongoing shortfall of currency reserves which continues to cause issues opening Letters of Credit.
